

GILLES P. GEORGES, PhD

Dr. Gilles Georges is Founder and President of ClarityPoint Solutions, an executive advisory practice serving CEOs, private equity firms, and senior leadership teams in industrial and life-sciences markets. He is a member of the PwC Executive Advisory Network, providing senior expertise on operational transformation and digital strategy engagements, and is currently leading an on-site manufacturing site recovery mandate covering directional diagnostic, multi-site roadmap, and operating cadence redesign.

Before founding ClarityPoint, Gilles held executive roles at CAS (American Chemical Society) and Milacron. As **Vice President and Chief Scientific Officer of Content Operations at CAS**, he led a global team of 1,000+ employees and partners and a \$102M OpEx budget, delivering +20% productivity, -17% operating cost, and \$3.7M in avoided infrastructure spend by moving content curation to an AI-enhanced, cloud-native platform supporting flagship products including SciFinder. As **Vice President and General Manager of Milacron's Americas Fluids Division**, he controlled a \$95M multi-country P&L and delivered +15% North American revenue and 98% first-time-right quality through digital plant systems and an EOS-style operating cadence.

Earlier, as **Business Director at DuPont/Axalta**, Gilles owned the turnaround of a \$150M North America P&L, delivering +14% revenue and +4% EBITDA inside one year alongside a \$2.5M inventory reduction. At **3M** he held commercial leadership roles across the Electronics and Oil & Gas Market Centers: he drove the launch of an optically clear adhesive (LOCA) generating \$30.2M in new sales and +28% market share at Sony and Apple, and he led 3M's entry into upstream oil & gas drilling fluids and condensate recovery, securing real-condition validation with Schlumberger at BP North Sea and Oman Gas and producing \$5M in new product revenue after launch.

Gilles holds a Ph.D. in Chemistry from Université de Montréal and an MBA from HEC Montréal, with additional programs at MIT CSAIL (machine learning, blockchain) and Harvard (business analytics). He is bilingual in English and French. His delivery model emphasizes operational discipline, honest scoping, and direct accountability between strategy and execution.
