

GILLES P. GEORGES, PhD

Cincinnati, OH • (832) 349-0528 • ggeorges11@gmail.com • linkedin.com/in/gilles-georges

President & Turnaround Executive | Multi-Site P&L | Digital Transformation & AI-Driven Operations

Global Operations | Full-Scope P&L & Turnaround | Digital Transformation (AI, Cloud, Automation) | Supply Chain & Logistics | S&OP/EOS Operating Cadence | People & Culture | Quality/EHS | Data-Led Modernization

Leads international, multi-site P&L turnarounds from assessment through execution, linking strategy, operations, and digital modernization with revenue, margin, and customer outcomes. Proven track record stabilizing underperforming businesses by rebuilding commercial engines, installing operating discipline (EOS/KPI-OKR + S&OP), and driving measurable EBITDA improvement. Partners across C-suite functions to deliver rapid, sustainable results.

Modernizes operating systems through AI, cloud, and automation adoption, deploying analytics dashboards, predictive tools, and workflow automation to accelerate decision-making and reduce cost. Builds high-performance teams and a safety/quality culture across diverse geographies. Bridges the gap between operational excellence and emerging technology to create durable competitive advantage.

P&L Turnaround & EBITDA Improvement • Digital Transformation (AI/ML, Cloud, Automation) • Operating Cadence (EOS/KPI-OKR) • LEAN/Six Sigma • Supply Chain & S&OP • Cross-Functional Leadership • Analytics & Dashboarding • Change Management

CAREER EXPERIENCE

ClarityPoint Solutions, Cincinnati, OH

2024–Present

Executive advisory to CEOs and PE firms using the CLARITY framework to turn strategy into results for industrial and life-sciences companies. Designs M&A screens, digital-ops roadmaps, EOS operating cadence (KPI/OKR + S&OP), and turnaround frameworks linking strategy with execution.

President

- **Member of PwC Executive Advisory Network (EAN)**, providing senior-level expertise on operational transformation and digital strategy engagements for PwC's consulting practice.
- **Active manufacturing site recovery engagement:** on-site delivery of directional diagnostic, multi-site roadmap, and operating cadence redesign under a compressed client-imposed timeline; solo delivery model with explicit client-side data and access dependencies named as requirements.
- **Top acquisition-ready targets identified** after screening 300+ chemical/biotech companies; built a scoring model (fit, TAM, synergy, integration risk) and a CEO/PE decision funnel.
- **Partner to top-tier firms (incl. McKinsey & Company):** delivered subject-matter expertise on information businesses, shaping client growth theses and operating plans.
- **AI and data-platform adoption roadmaps** developed for leadership teams, linking digital capabilities (AI/ML, cloud, automation) to measurable business outcomes.
- **Turnaround playbooks built and deployed:** embedded digital adoption (workflow automation, analytics, predictive tools) and operating rhythms to stabilize performance and improve service/cost.
- **Execution blueprints** combining technology, operations, and KPI dashboards to unlock new revenue and efficiency gains for clients.

CAS (a Division of The American Chemical Society), Columbus, OH

2019–2024

Global scientific information provider delivering curated chemical and life-sciences data, software, and AI-powered analytics to pharma and chemical markets.

Vice President & Chief Scientific Officer, Content Operations

Reported to the President; led **\$102M** OpEx and a global team of **1000+** employees and partners. Transformed content-curation and data architecture into an AI-enhanced, cloud-native platform for flagship products (e.g., SciFinder).

- **\$3.7M planned spend avoided** by replacing on-prem infrastructure with a cloud, AI-enhanced content-curation platform.
- **+20% productivity, -17% operating cost, -26% WIP** by automating curation with AI/ML, redesigning UX, and enabling straight-through processing.

- **\$1.2M in new revenue** from launching an AI-driven life-sciences intelligence platform delivering predictive insights to biotech/pharma clients.
- **+16% global capacity; -25% U.S. FTEs (via attrition/redeployment)** by standing up an India subsidiary and moving routine work, while maintaining SLAs and quality.
- **+\$2M purchased-content value unlocked** by eliminating manual handling via ML-assisted analysis and automated routing.
- **+20-pt engagement and 90% top-talent retention** through coaching, succession planning, and culture building.
- **COVID-19 research initiatives led** (vaccine, repurposing, mRNA), strengthening CAS's scientific profile and public-health impact.

Milacron, Cincinnati, OH

2016–2019

Global \$1.5B manufacturer of plastics-processing technologies (injection molding, extrusion) and industrial fluids, serving automotive, packaging, consumer, and medical markets across the Americas, Europe, and Asia.

Vice President & General Manager, Fluids Division, Americas Region

Controlled **\$95M** P&L across U.S./Canada/Mexico/Argentina/Brazil; CapEx \$7.5M; team 12 direct / **252** employees; reported to the President. Led multi-plant digital and operational modernization across blending, packaging, and QC, including production-data integration, plant-floor automation, and real-time KPI dashboards.

- **+15% NA revenue; +17% U.S. transactions** by rebuilding distributor/service network and connecting CRM pipeline to production data.
- **OTIF 95%; stockouts -4%** after instituting an EOS operating cadence (weekly KPI/OKR + S&OP, real-time dashboards and analytics) with named owners across plants, service, and supply chain.
- **98% first-time-right; QC cost -25%** via advanced mixing/packaging automation investments.
- **Inventory cost -\$950K; conversion +7%** through portfolio streamlining and e-commerce channel expansion.
- **Lead times ↓; plan reliability ↑** by tightening LEAN/MRP (reorder points, prioritization, tiered huddles).

DuPont / Axalta Coating Systems, Houston, TX

2013–2016

\$5.3B global enterprise specializing in automotive and industrial coatings.

Business Director, North America

Owned the turnaround of a **\$150M** North America P&L; managed \$7M CapEx; led 12 direct / **196** employees across sales, planning, supply chain, logistics, and customer service.

- **+14% revenue; +4% EBITDA (1 yr)** via data-driven pricing/mix strategy and org/KPI discipline.
- **98% service level; DSI 45→30; delivery cost -\$900K** achieved by running an EOS operating cadence (KPI/OKR + S&OP; OTIF, quality, cost) across a multi-site network.
- **Inventory -\$2.5M** through segmentation and service-level redesign.
- **\$1.8M OpEx saved** by optimizing production, automation, safety, and QC.
- **Product transition time -50%** with process, safety, and quality improvements.
- **Engagement +20 pts; 90% top-talent retention** via coaching, scorecards, and succession planning.

3M, St. Paul, MN

2006–2013

Global materials-science and manufacturing company; adhesives, films, abrasives, safety. Oil & Gas Market Center: glass microspheres and proprietary surfactant technologies for upstream drilling fluids and condensate recovery.

Global Business Development Manager, Electronics Market Materials Division (2010–2013)

Reported to the VP; led **44** employees and managed \$1.8M CapEx, contributing to a **\$75M** P&L; drove LOCA/optical films commercialization and Sony/Apple qualifications across TW/CN/KR.

- **\$30.2M new sales** from an optically clear liquid adhesive (LOCA); led design and commercialization, qualified at Sony/Apple plants in TW/CN/KR.
- **+28% market share (16 months)** by driving aggressive LOCA commercialization and value positioning.
- **\$1.7M inventory & freight savings; +35% CSAT; -21% waste** by optimizing offshore conversion and supply-chain flows.

Business Development Manager, Oil & Gas Market Center (2006–2010)

Reported to the VP; led **39** employees (11 direct + 28 indirect) and managed \$4.5M CapEx and \$17M OpEx, supporting a **\$55M** P&L; drove 3M's commercialization of Glass Microspheres and proprietary surfactants into upstream oil & gas applications.

- **\$5M new product revenue post-launch** by validating 3M proprietary surfactant technology for condensate recovery; designed testing protocol with University of Texas and ran live-condition trials with Schlumberger at BP North Sea and Oman Gas, securing operator validation ahead of official product launch.
- **Glass Microspheres (GM) qualified as drilling-fluid additive** by building the executive case at 3M to fund a live US drilling experiment; selected the US-based vendor, ran the trial, and proved GM performance in the toughest formations with acceptable attrition versus gas and cenospheres.
- **\$14M commercial pipeline opened; +18% adoption interest from service companies** through a customer-facing technical package positioning GM as a stable, reliable, low-density alternative to lower-cost / lower-quality density-reduction additives, exposing performance and total-cost advantages for the toughest drilling formations.

EDUCATION & PROFESSIONAL DEVELOPMENT

Doctor of Philosophy (PhD) in Chemistry | Université de Montréal, Montreal, Canada

Master of Business Administration (MBA) | HEC Montréal, Montreal, Canada

Diploma in Management | McGill University, Montreal, Canada

Master of Science in Materials Science | Université de Pau, Pau, France

Business Analytics Program | Harvard University, Cambridge, USA

Certificate Programs in Machine Learning & Blockchain | MIT Computer Science & AI Laboratory (CSAIL), Cambridge, USA

Certified Six Sigma Black Belt | 3M Corporation, Minneapolis, USA

AWS Cloud Practitioner | Certified

LANGUAGE PROFICIENCIES

English & French (bilingual); German, Spanish (basic proficiency)

PROFESSIONAL ASSOCIATIONS & AWARDS

American Chemical Society; Society of Petroleum Engineers, Member.

PwC Executive Advisory Network (EAN), Member.

Catalyst Award recipient (Biotech, Drug Discovery, Materials, Renewable Energy).

3M, Golden Step Award (x3); New Product Revenue Award (\$10M in two years).

TECHNICAL SKILLS & GLOBAL SCOPE

Digital Manufacturing & Plant Systems: MES / QMS / CMMS familiarity, plant-floor automation, machine-data integration, real-time KPI dashboards, industrial IoT concepts, OT/IT convergence, manufacturing decision support and analytics.

AI, Cloud & Data Ecosystems: AI/ML strategy, data architecture, cloud integration (AWS); familiar with Python, PyTorch, and model-lifecycle concepts.

Analytics & Digital Tools: Power BI, Python, Salesforce/CRM, SAP/Oracle ERP, Excel, Smartsheet/MS Project, advanced dashboarding and KPI automation.

Process & Transformation: Digital transformation, blockchain applications, automation, LEAN, Six Sigma, EOS/Scaling Up.

Global Leadership: Led multi-site teams and programs across the Americas (U.S., Canada, Mexico, Brazil, Argentina), Europe (EU/UK), and Asia (China, Taiwan, Korea, India).
